

Identity Authorization & Payment Service
for Metaverse

MetaWallet

Presented by NTT DATA

メタバースの本人確認や決済を
誰でも「カンタン・ベンリ」に!

- ✔ No tedious installation required
- ✔ No need for designated coins or virtual currencies
- ✔ Anyone can easily use without specialized knowledge

Enjoy the world of Web 3.0 without the complexity!

Unlike conventional Web 3.0 wallets, MetaWallet provides the same ease of use as familiar e-commerce services. Anyone can easily enjoy shopping in the metaverse.

Features of MetaWallet

POINT
01

Able to pay with traditional payment methods

You do not need to purchase metaverse coins or virtual currencies in advance. You can simply pay with a credit card.

POINT
02

Centralized KYC information management

Unlike current Web3.0 wallets, MetaWallet supports identity verification and can connect to various metaverse spaces.

POINT
03

Support for Web3.0 tokens

MetaWallet is set to support future Web3.0 tokens.
